ONCQUEST Introduces

Most advanced Prenatal Test PANORAMA™

“India’s Leading Super Specialized Laboratory”

Key Features:

- Panorama™ is the most advanced Non-Invasive Pre Natal Test.
- Only Non Invasive Pre natal Test (NIPT) that can identify Triploidy.
- Uses Single Nucleotide Polymorphisms (SNPs) to differentiate maternal from the cell free fetal DNA.
- Differentiate between maternal & fetal DNA by utilizing patented algorithm called Next Generation Aneuploidy test.
- Sensitivity & specificity >99%for Trisomy 21, 18,13,Triploidy, Monosomy X & Presence of Y.
- Test is accurate even at fetal fractions as low as 4%.
- Extremely low false positive rate (0.001%)
- Less time consuming than other NIPT tests.
- Detection period is as early as 9 weeks of gestation.

Our Offering

Test Code	Test Name	Technique	TAT
SMO10143	Panorama NIPT	SNP- array	14 working days
SMO10144	Panorama with 22q.11 microdeletion	SNP- array	14 working days
SMO10145	Panorama microdeletion Panel	SNP- array	14 working days
